PROJECT OVERVIEW

Tools

SQL, Excel, Power
BI & Tableau

Purpose

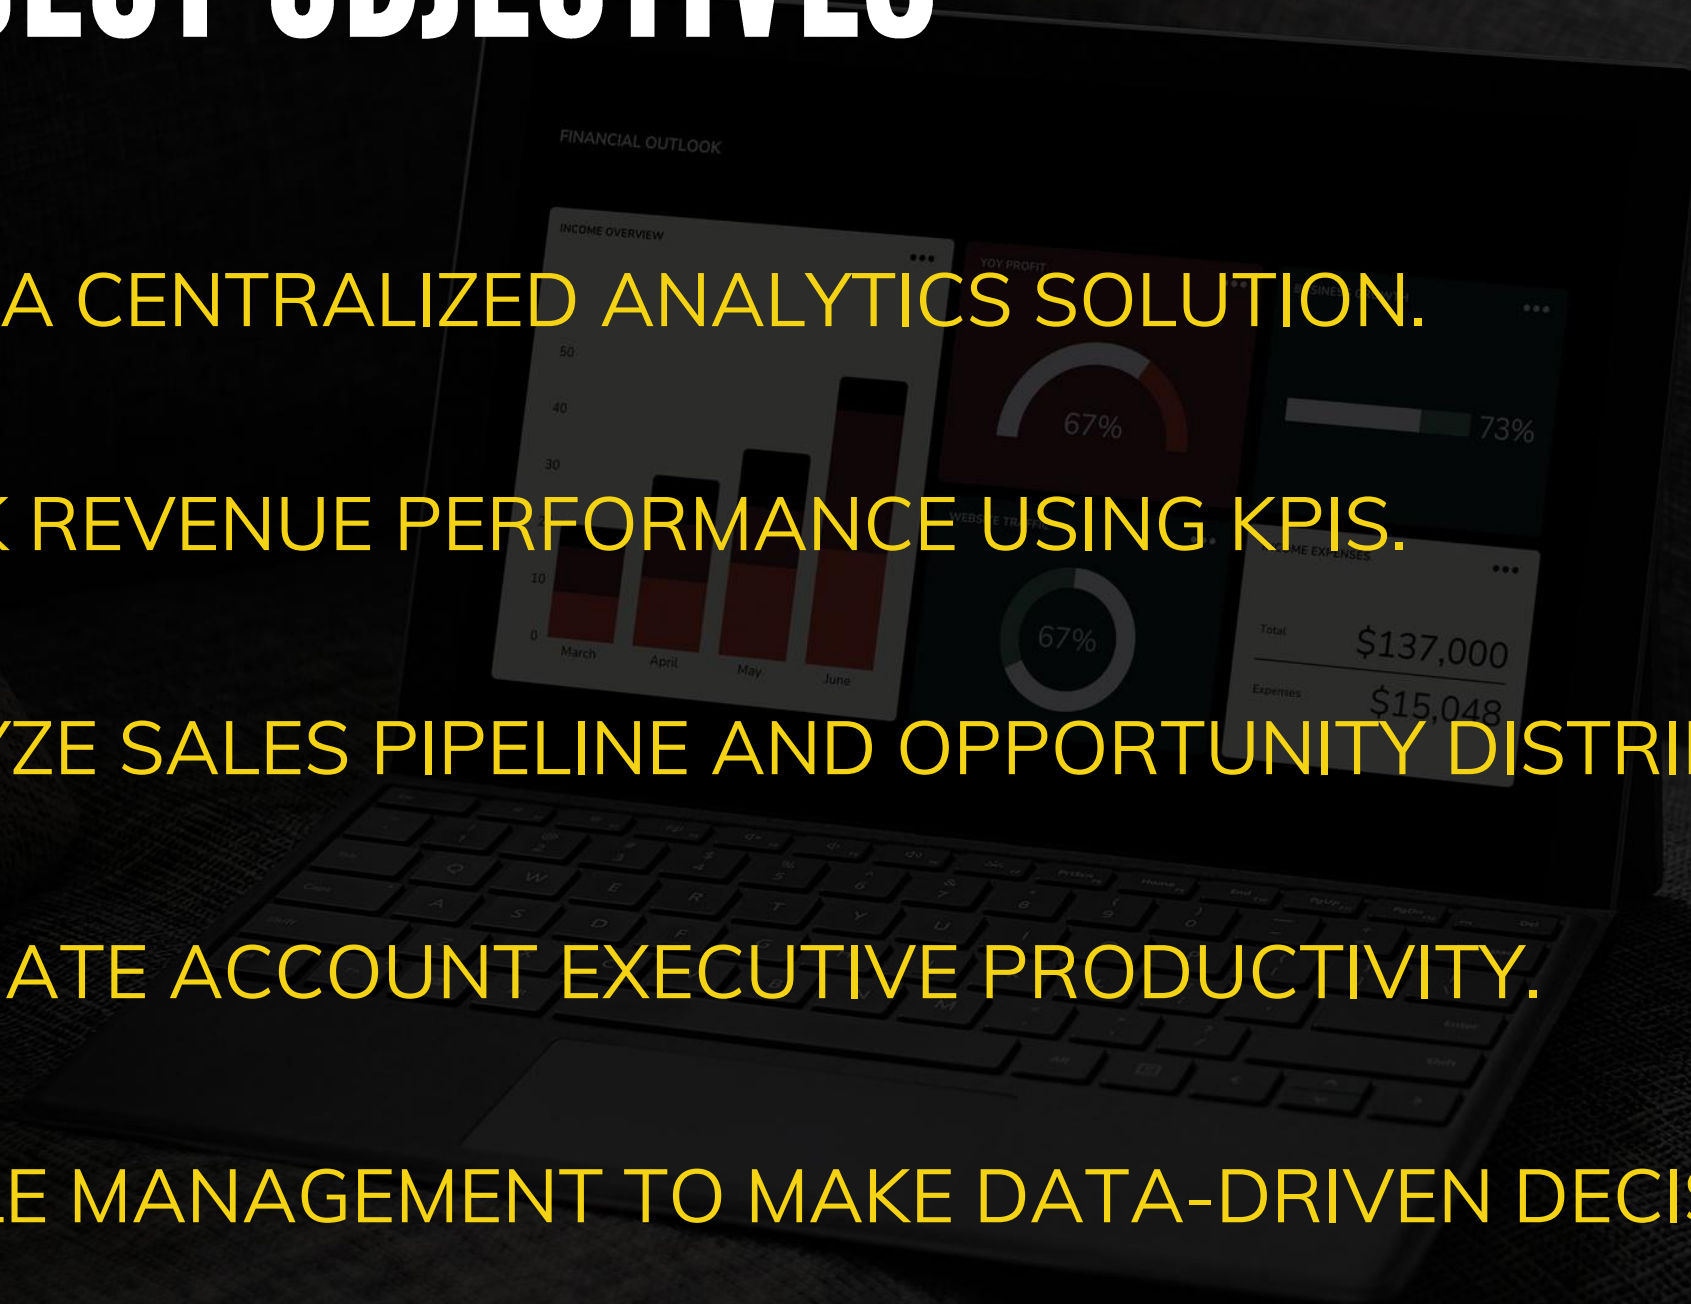

Analyse insurance sales
performance,
opportunity pipeline, and
executive productivity

Focus

Identify business
problems, analyse KPIs,
and support data-driven
decisions

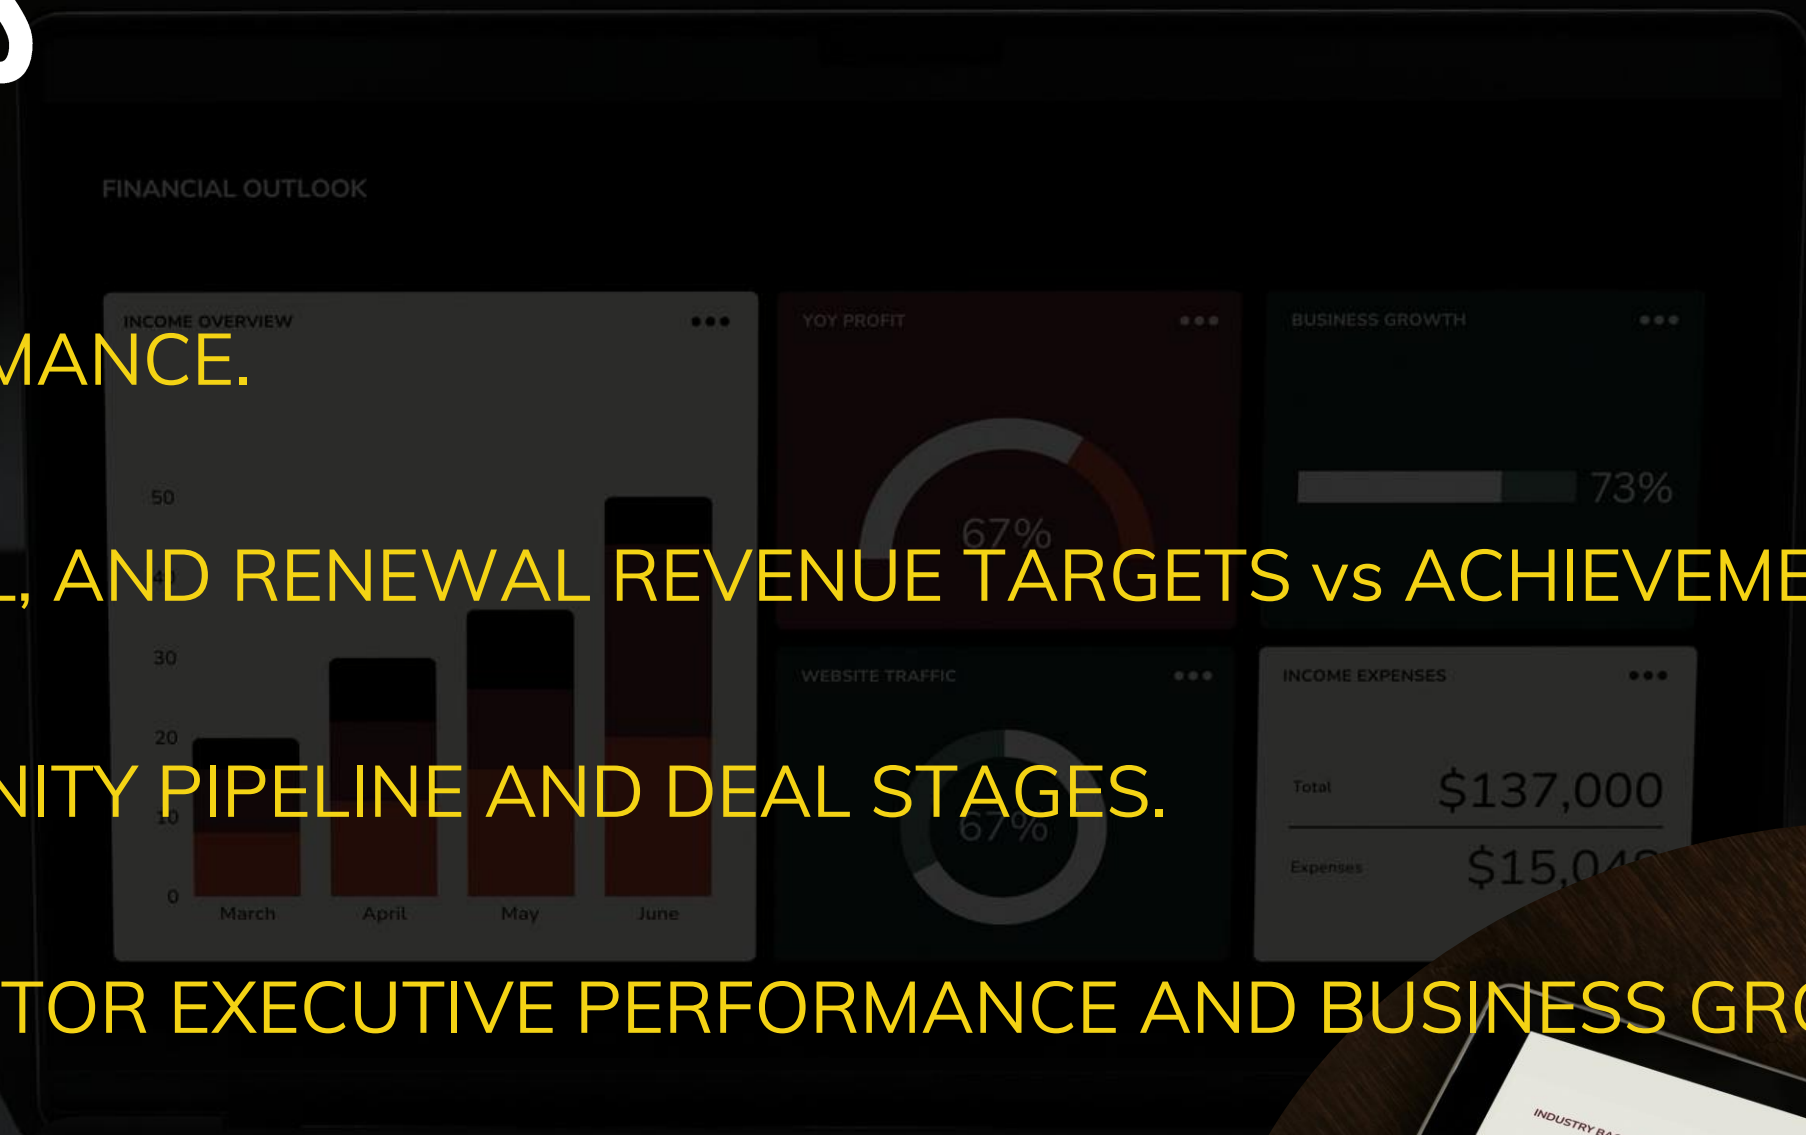

PROJECT OBJECTIVES

- BUILD A CENTRALIZED ANALYTICS SOLUTION.
- TRACK REVENUE PERFORMANCE USING KPIS.
- ANALYZE SALES PIPELINE AND OPPORTUNITY DISTRIBUTION.
- EVALUATE ACCOUNT EXECUTIVE PRODUCTIVITY.
- ENABLE MANAGEMENT TO MAKE DATA-DRIVEN DECISIONS.

BUSINESS PROBLEMS

- LACK OF VISIBILITY INTO SALES PERFORMANCE.
- DIFFICULTY TRACKING NEW, CROSS SELL, AND RENEWAL REVENUE TARGETS vs ACHIEVEMENTS.
- LIMITED UNDERSTANDING OF OPPORTUNITY PIPELINE AND DEAL STAGES.
- NO CENTRALIZED DASHBOARD TO MONITOR EXECUTIVE PERFORMANCE AND BUSINESS GROWTH.

DATA SOURCES

BROKERAGE TABLE

– Policy and revenue data

FEES TABLE

– Additional revenue transactions

INVOICE TABLE

– Billing information

MEETING TABLE

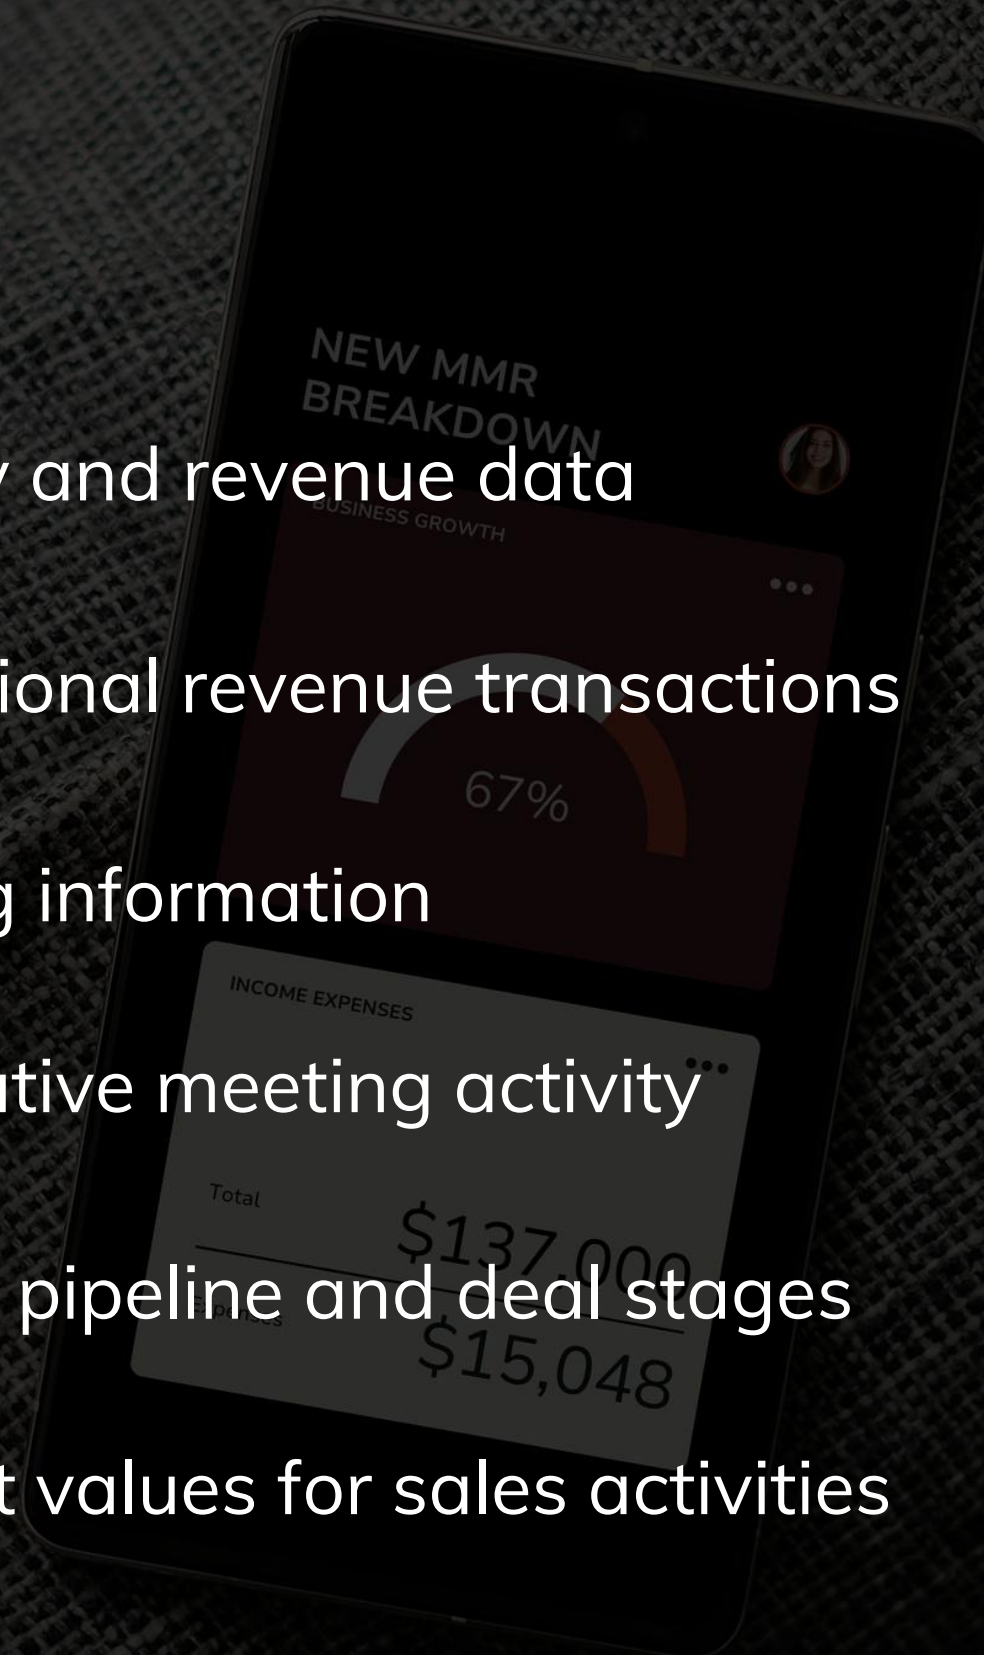

– Executive meeting activity

OPPORTUNITY TABLE

– Sales pipeline and deal stages

BUDGET TABLE

– Target values for sales activities

SALES PERFORMANCE KPIs

ANALYZED REVENUE PERFORMANCE ACROSS:

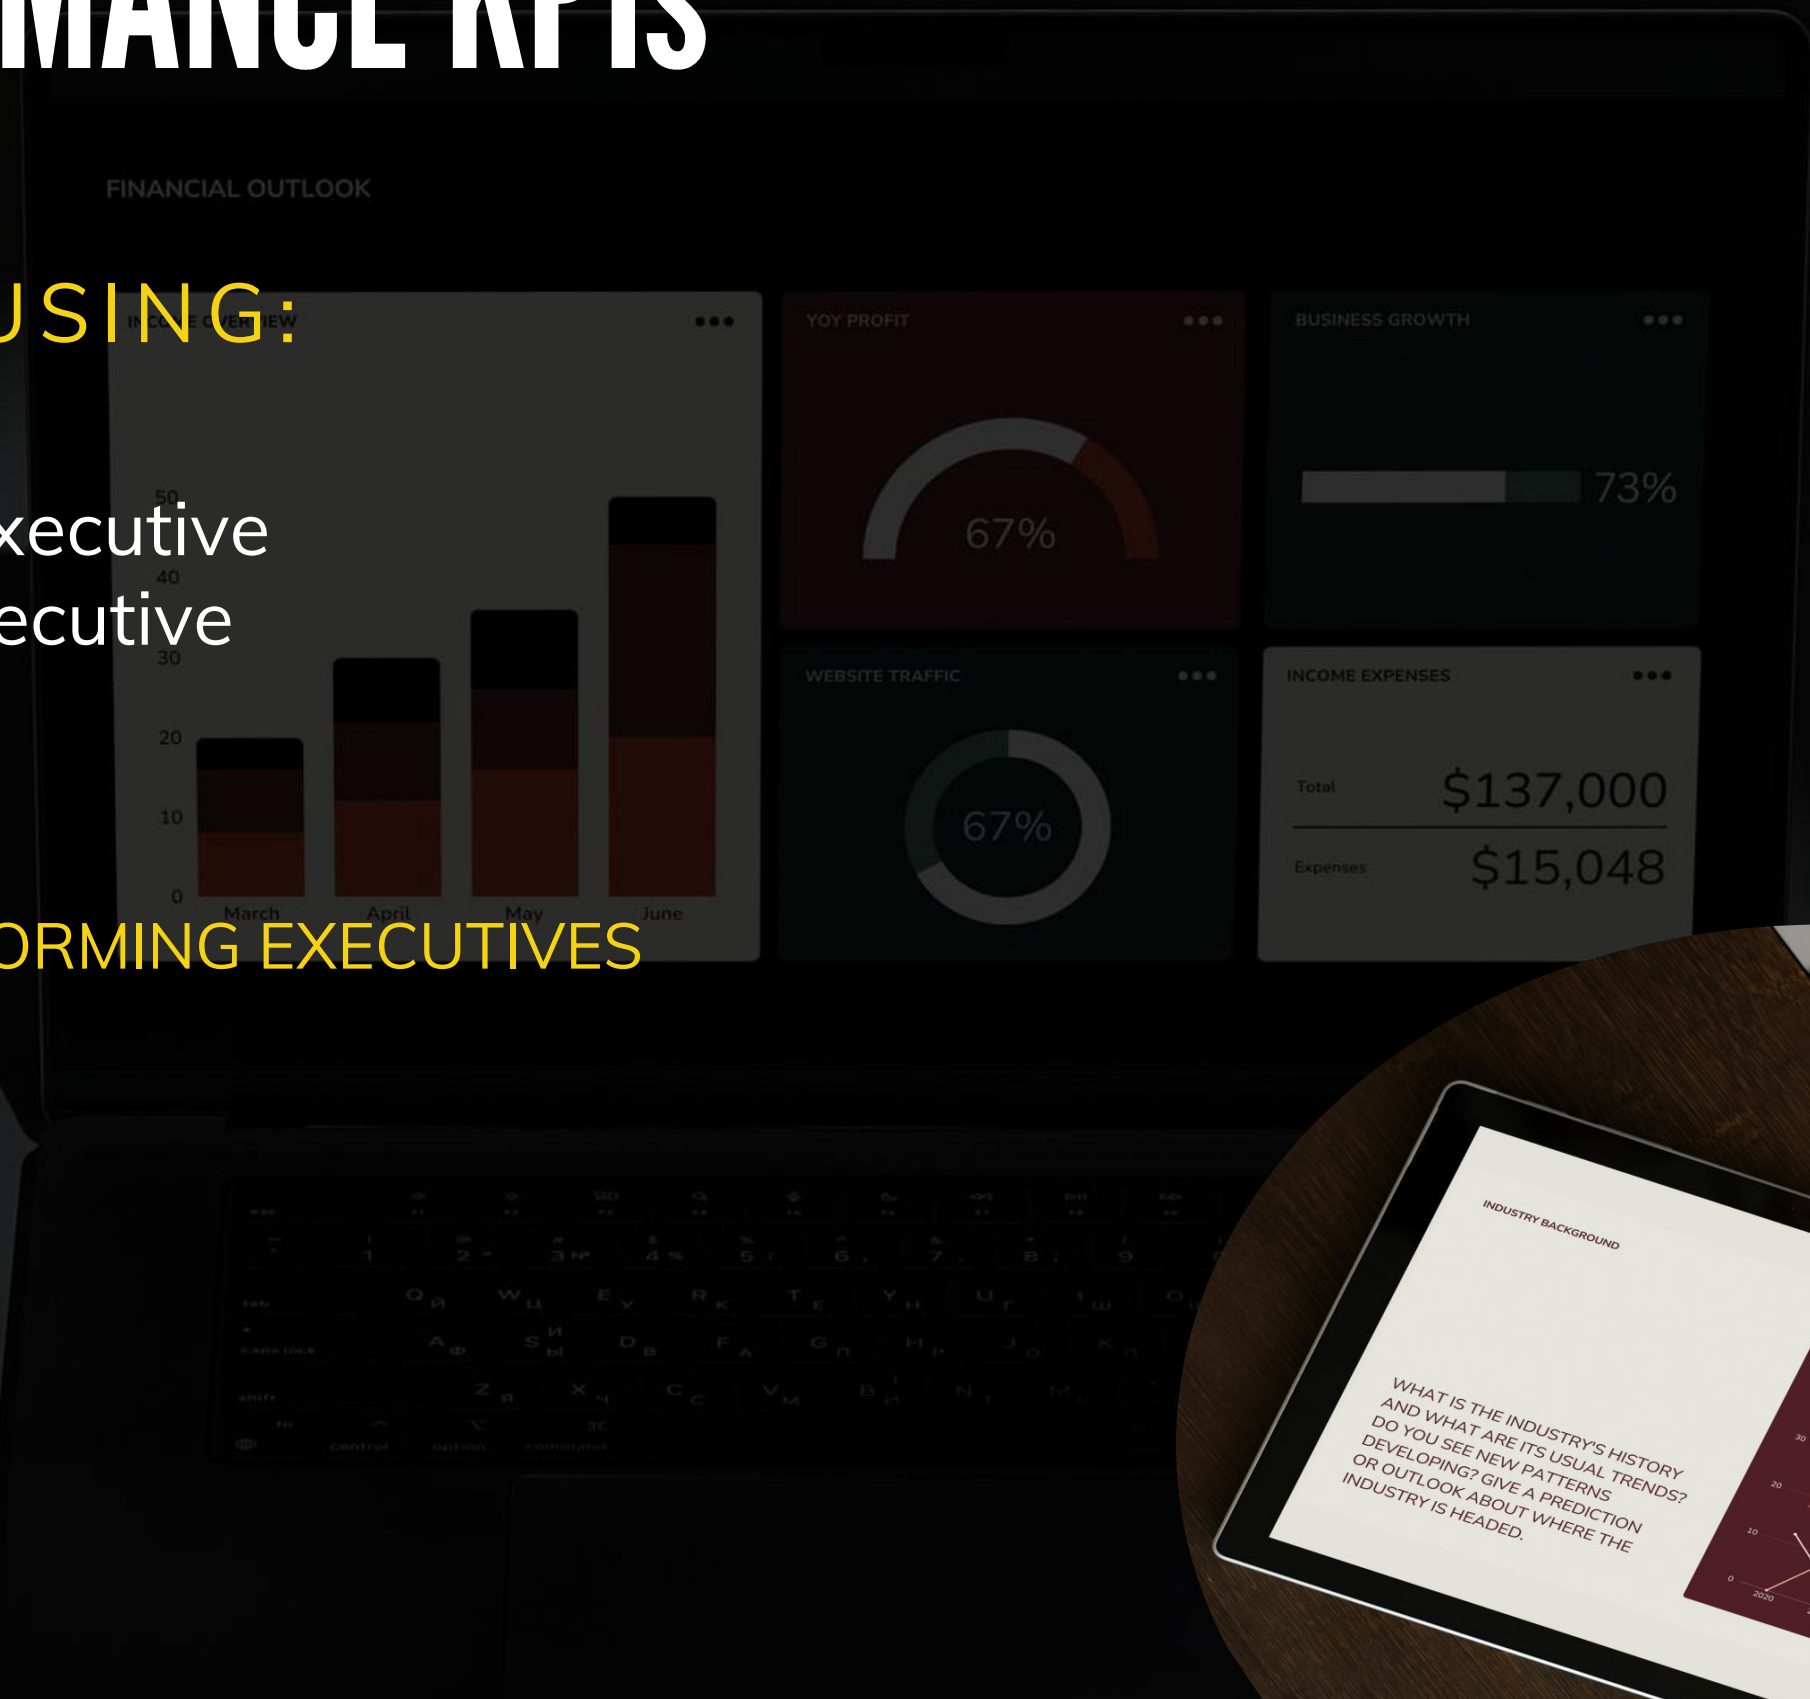

- New Business
 - Cross Sell Business
 - Renewal Business
- Compared **TARGET** vs **ACHIEVED** values to evaluate business growth and performance.

OPERATIONAL PERFORMANCE KPIs

MEASURED PRODUCTIVITY USING:

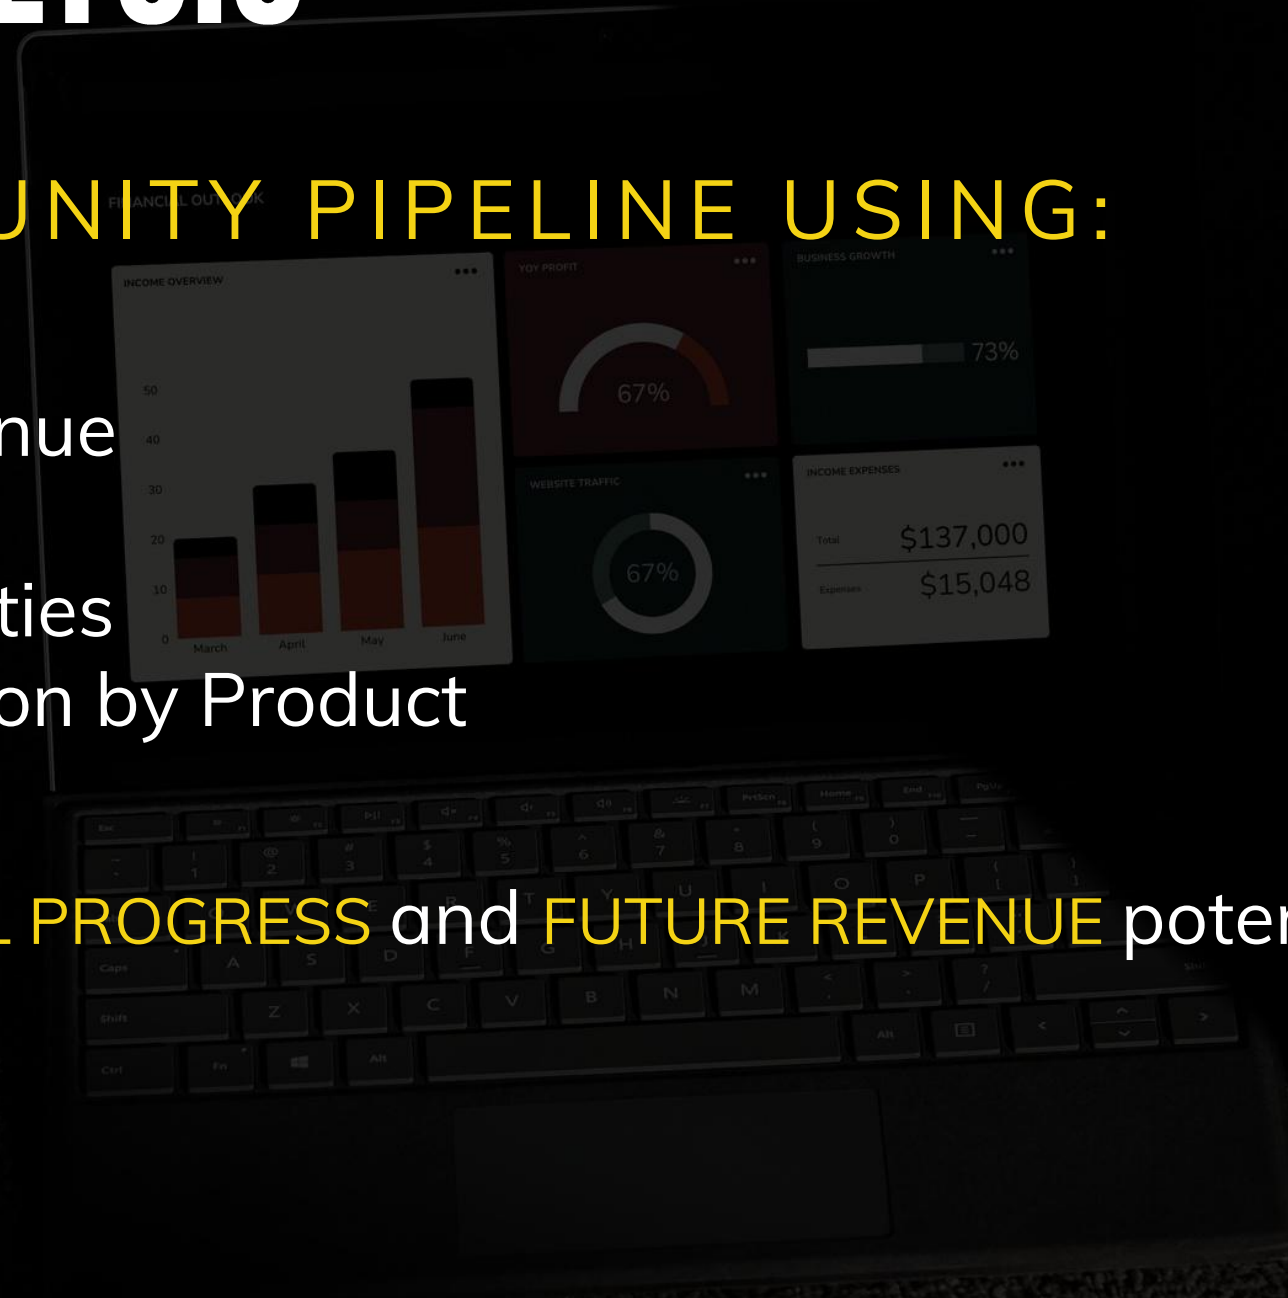

- Number of Meetings by Account Executive
 - Number of Invoices by Account Executive
 - Yearly Meeting Trends
- This analysis helps identify high **PERFORMING EXECUTIVES**

PIPELINE ANALYSIS

ANALYZED OPPORTUNITY PIPELINE USING:

- Stage Funnel by Revenue
 - Total Opportunities
 - Total Open Opportunities
 - Opportunity Distribution by Product
-
- This helps understand **DEAL PROGRESS** and **FUTURE REVENUE** potential

SQL ANALYSIS

USED SQL TO CALCULATE KEY KPIS:

- New, Cross Sell, Renewal – Target vs Achieved
 - Placement Achievement %
 - Invoice Achievement %
 - Total Opportunities
 - Open Opportunities
 - Stage Funnel Revenue
-
- This helped transform raw data into meaningful **BUSINESS METRICS**

SQL ANALYSIS

```
1 • use insurance_analysis;
2
3 -- (1) Total Opportunities
4 • select count(distinct opportunity_id) as Total_Opportunitites from opportunity;
5
6 -- (2) Open Opportunities
7 • select count(distinct opportunity_id) as Open_Opportunities from opportunity where stage in ('qualify opportunity','propose solution');
8
9 -- (3) Cross Sell,New,Renewal wise Target,Achieved,Invoice
10 • select t.income_class, t.target, coalesce(a.achieved, 0) as achieved, coalesce(i.invoice_total, 0) as invoice
11   from (select 'cross sell' as income_class, sum(cross_sell_bugdet) as target from target
12         union all
13         select 'new' as income_class, sum(new_budget) as target from target
14         union all
15         select 'renewal' as income_class,sum(renewal_budget) as target from target) t
16   left join
17   (select income_class, sum(fees_amount + brokerage_amount) as achieved
18     from(select income_class, sum(fees.amount) as fees_amount, 0 as brokerage_amount from fees
19          group by income_class
20          union all
21          select income_class,0, sum(brokerage.amount) from brokerage
22          group by income_class) x group by income_class) a
23   on t.income_class = a.income_class
24   left join
25   (select income_class, sum(invoice_processed.amount) as invoice_total from invoice_processed
26      group by income_class) i
27   on t.income_class = i.income_class;
```

```
56 -- (5) No of Meetings by Account Executive
57 • select account_executive, count(meeting_date) as meeting_count from meeting_list
58   group by account_executive
59   order by meeting_count desc;
60
61 -- (6) Yearly Meeting Count
62 • select year(meeting_date) as meeting_year, count(meeting_date) as meeting_count from meeting_list
63   group by meeting_year
64   order by meeting_count;
65
66 -- (7) Stage funnel by Revenue
67 • select stage, sum(revenue_amount) as total_revenue from opportunity
68   group by stage order by total_revenue desc;
69
70 -- (8) No of Invoice by Account Executive
71 • select account_executive, count(invoice_number) as invoice_count from invoice_processed
72   group by account_executive
73   order by invoice_count desc;
74
75 -- (9) Top 4 Opportunity by Revenue
76 • select opportunity_name, sum(revenue_amount) as total_revenue from opportunity
77   group by opportunity_name
78   order by total_revenue desc limit 4;
79
80 -- (10) Top 4 Open Opportunities
81 • select opportunity_name, sum(revenue_amount) as total_revenue from opportunity
82   where stage in ('qualify opportunity','propose solution')
83   group by opportunity_name
84   order by total_revenue desc limit 4;
```

ABOVE ARE SOME SQL QUERIES USED TO CALCULATE KEY BUSINESS KPIs AND TRANSFORM RAW DATA INTO ANALYTICAL INSIGHTS

EXCEL DASHBOARD

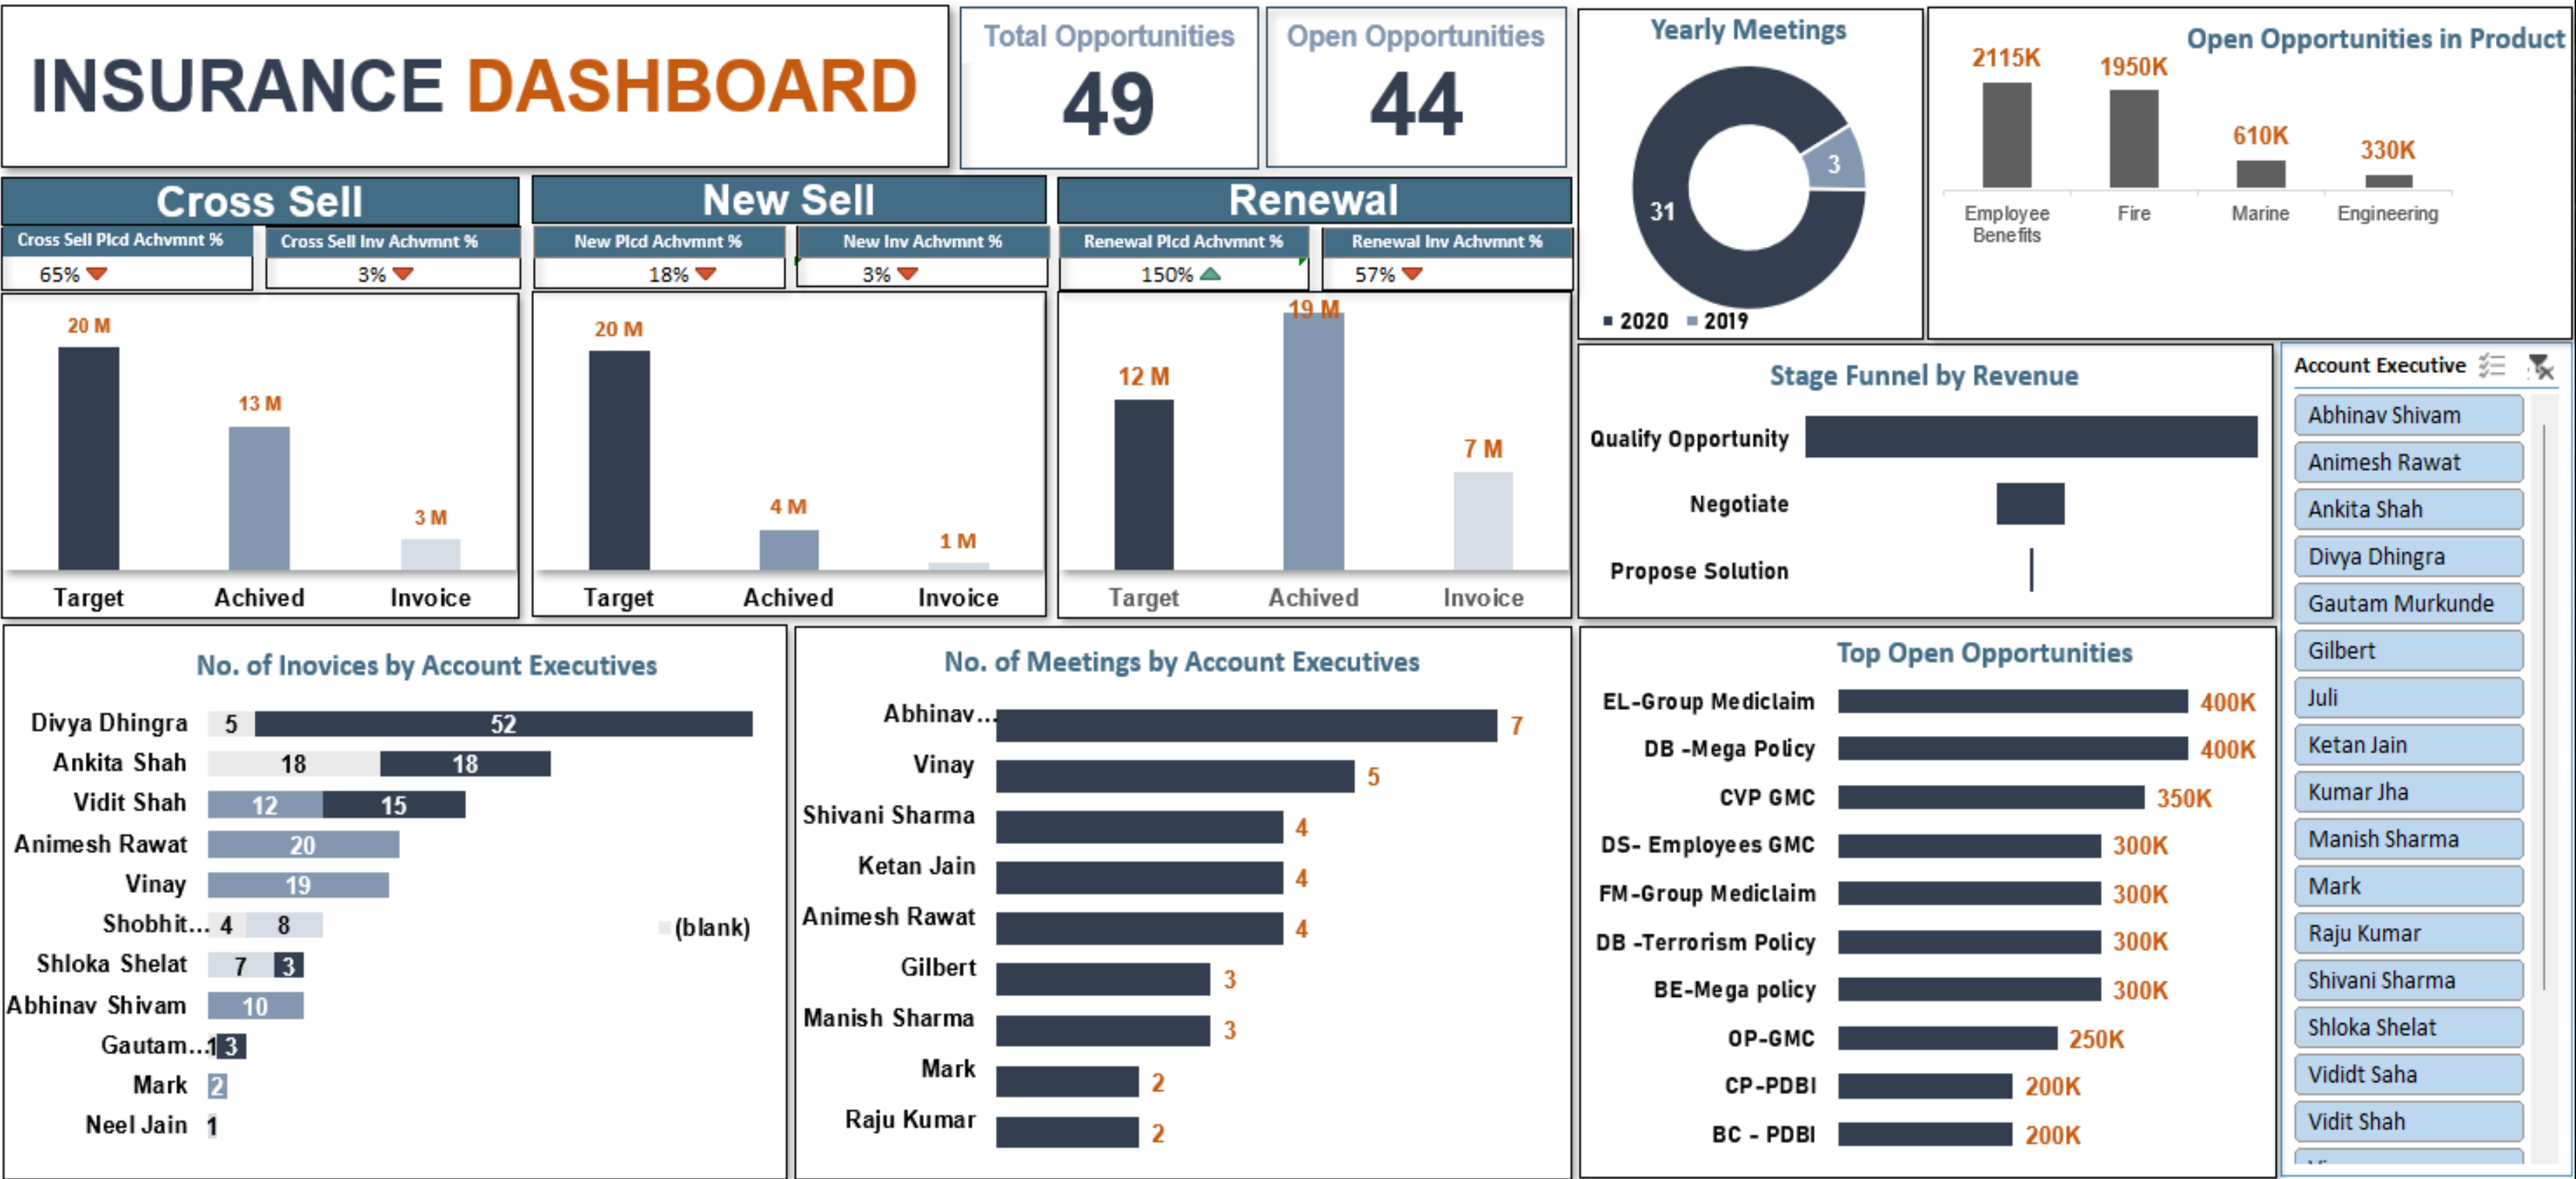

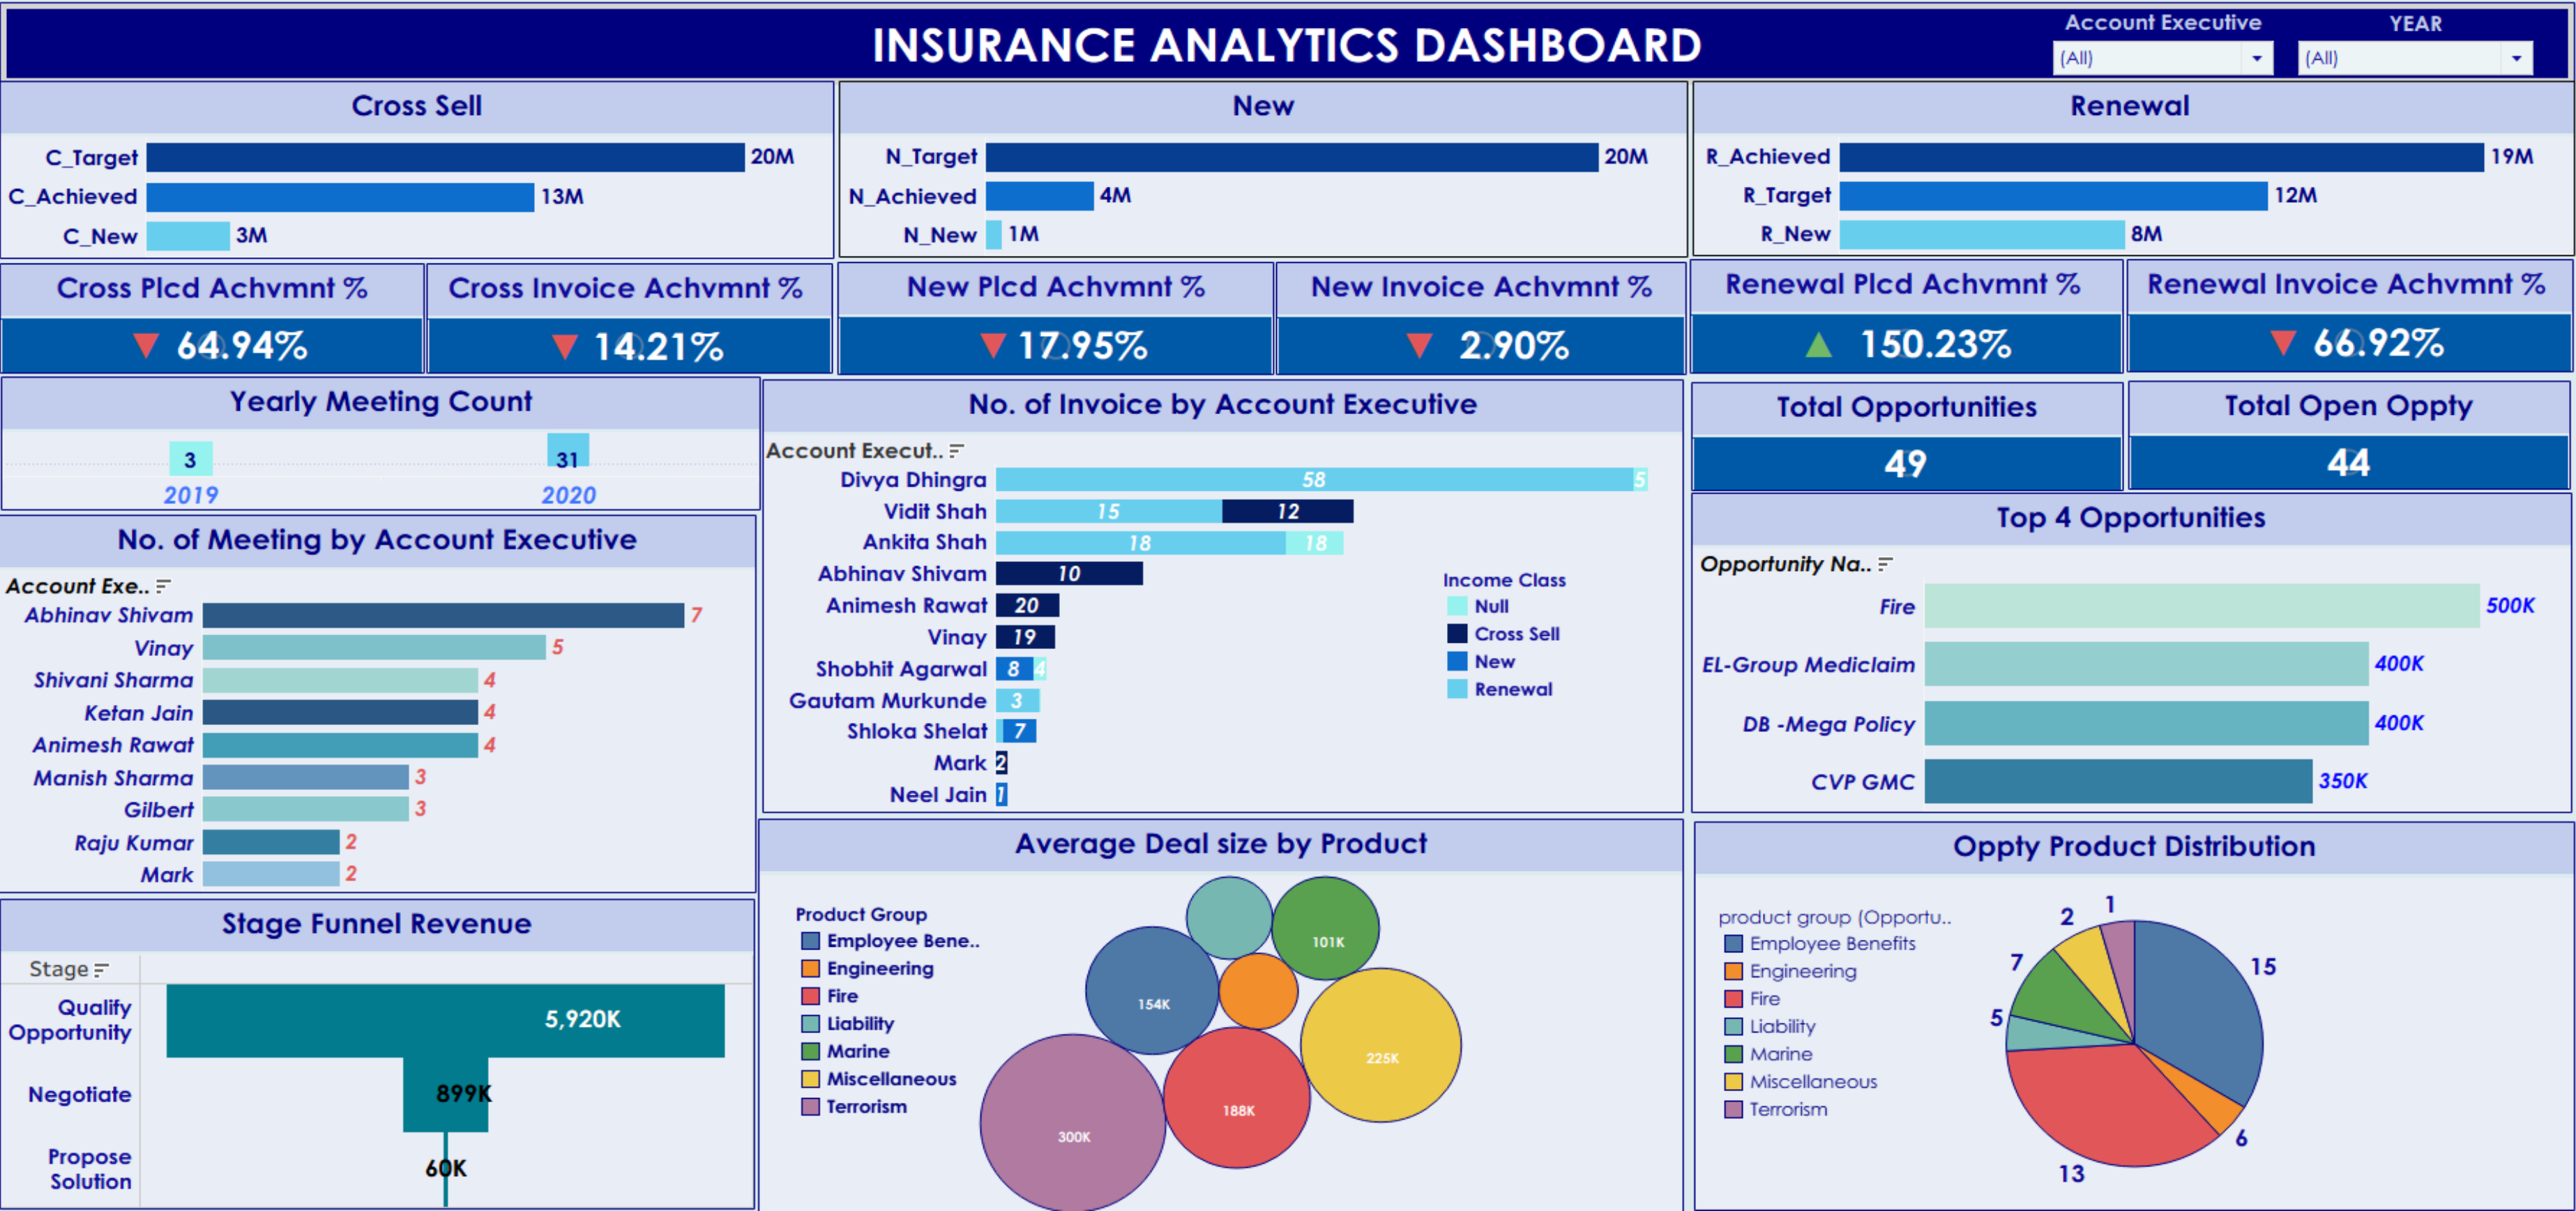

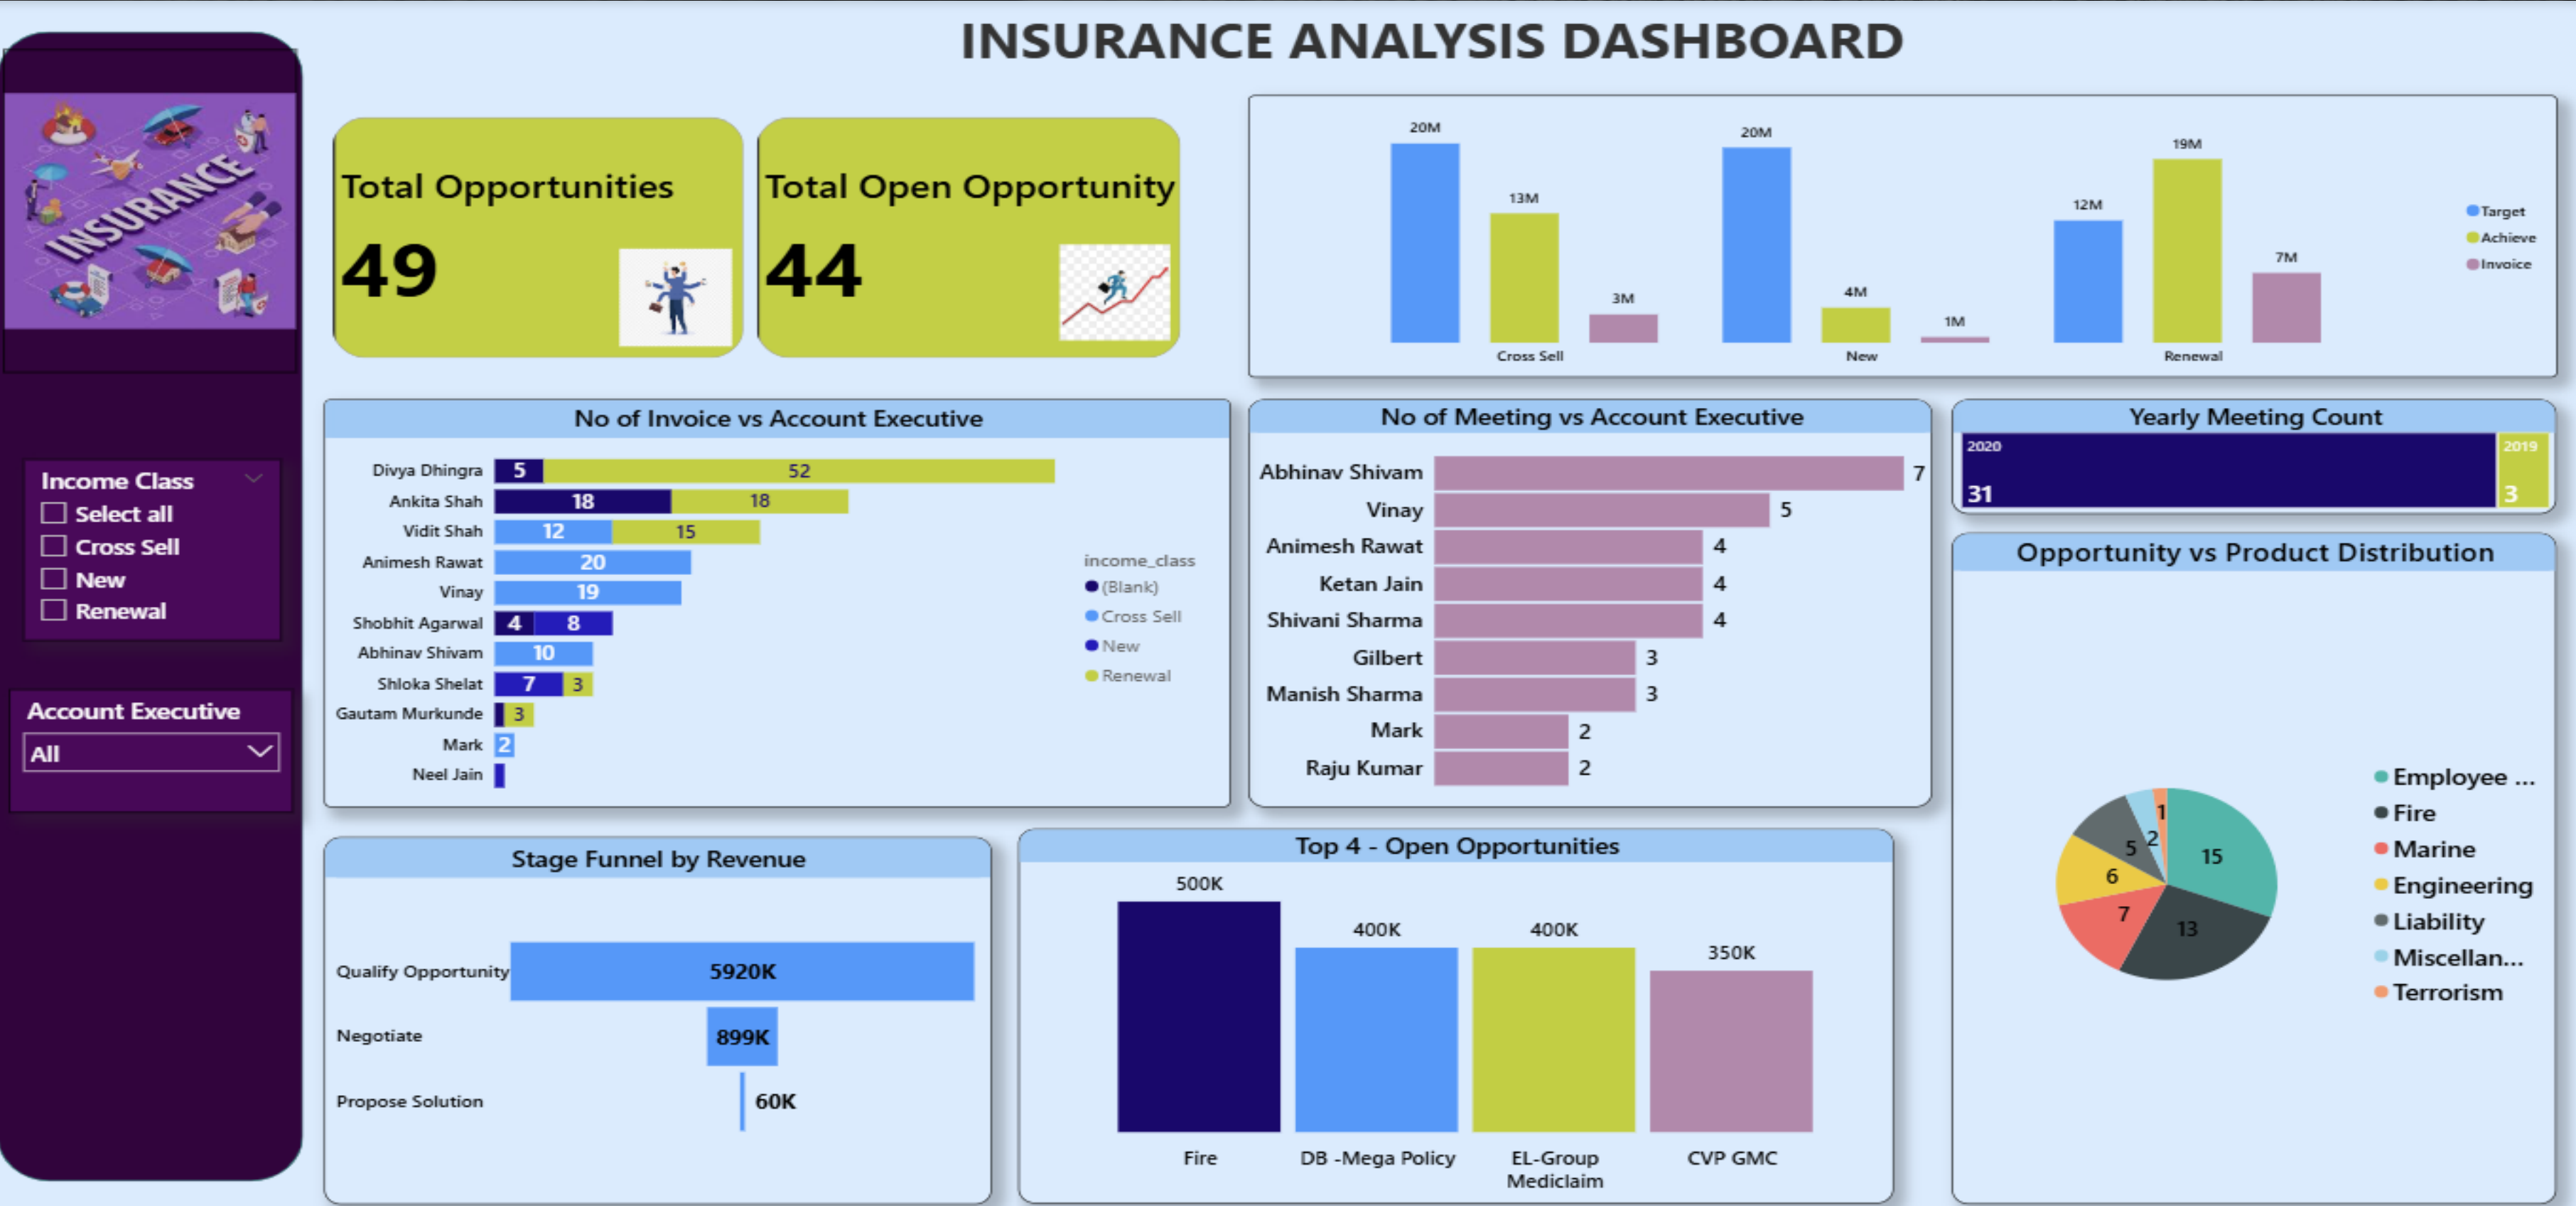

TABLEAU DASHBOARD

CREATED AN INTERACTIVE TABLEAU DASHBOARD TO ANALYZE REVENUE, PIPELINE AND EXECUTIVE PERFORMANCE

POWER BI DASHBOARD

KEY BUSINESS INSIGHTS

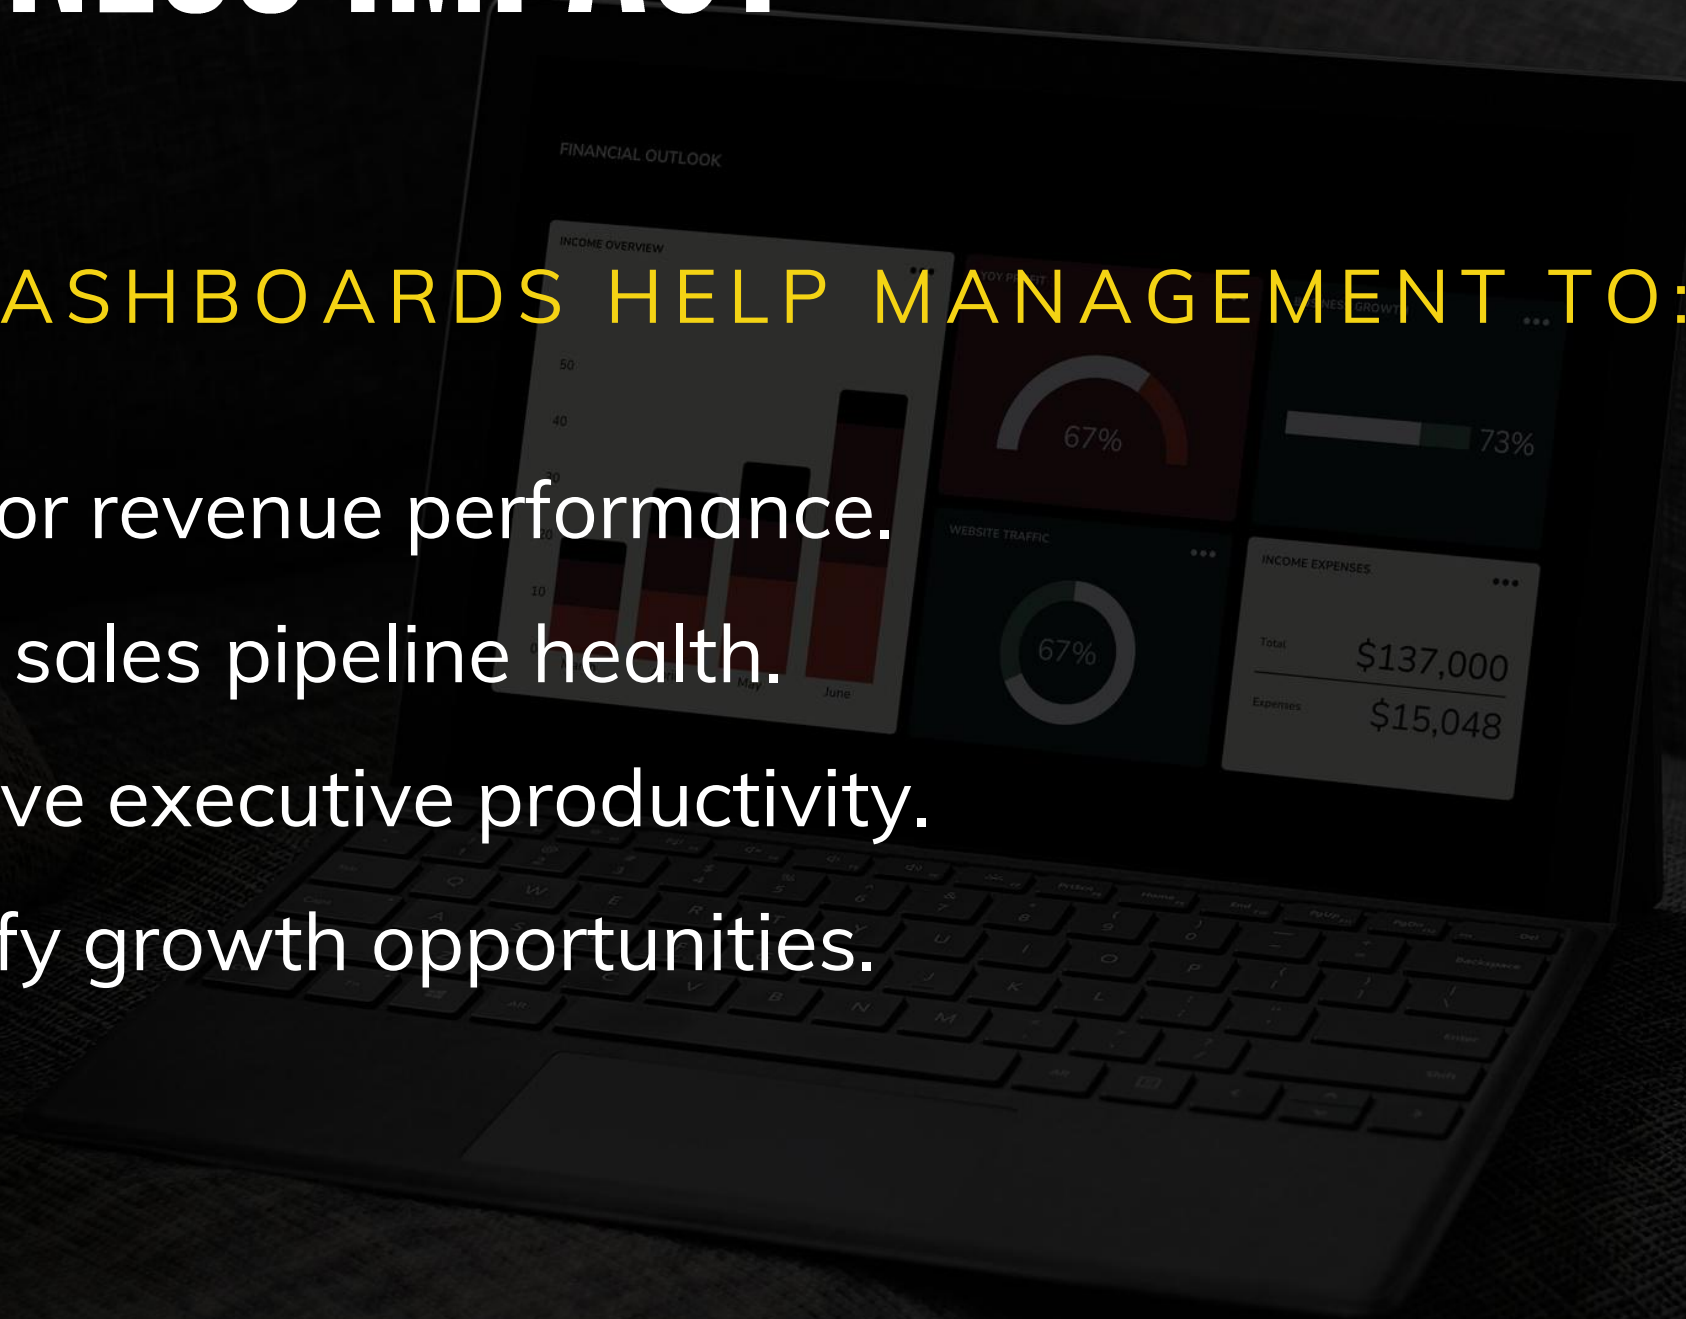

- ❑ IDENTIFIED REVENUE CONTRIBUTION FROM NEW, CROSS SELL, AND RENEWAL SALES.
- ❑ FOUND WHERE OPPORTUNITIES ARE STUCK IN PIPELINE STAGES.
- ❑ HIGHLIGHTED TOP PERFORMING ACCOUNT EXECUTIVES.
- ❑ ANALYSED WHICH PRODUCTS GENERATE MOST OPPORTUNITIES.

BUSINESS IMPACT

THE DASHBOARDS HELP MANAGEMENT TO:

- Monitor revenue performance.
- Track sales pipeline health.
- Improve executive productivity.
- Identify growth opportunities.

VISUALIZATION TOOLS

**Excel
Dashboard**

– QUICK KPI OVERVIEW

**Power BI
Dashboard**

– INTERACTIVE BUSINESS INSIGHTS

**Tableau
Dashboard**

– ADVANCED VISUAL ANALYTICS

All dashboards allow filtering by Year
and Account Executive

CONCLUSION

- THIS PROJECT DEMONSTRATES HOW DATA ANALYTICS CAN HELP INSURANCE COMPANIES.
- TRACK PERFORMANCE, IDENTIFY PROBLEMS, AND IMPROVE DECISION MAKING.
- USING SQL AND MODERN BI TOOLS

WE WANT TO SAY

THANK YOU

FOR YOUR ATTENTION
